ANTI-STICK COATINGS

FILTY BAKING TRAYS AND MOULDS ARE A THING OF THE PAST!!

Francois Products is specialised in applying **anti-stick coatings**.

Newly or used baking forms or trays and machine parts are furnished with our

Range of FBS Non-Stick Coatings. The **FBS / Non-Stick Coatings** are durable poly layered anti-stick coatings and do have excellent characteristics such as:

- make it possible to bake oil-free
- good non-stick qualities
- hygienic and enduring cleanness
- no carbon growth
- long service life
- increases the productivity
- decreases the failure rate
- decreases the total costs

FBS coatings are **dirt repellent**, while they prevent the built-up of carbon. There are many kinds of coatings. For applications in the industrial bakeries they have to comply with very severe demands. Even the **cleaning** of your coated material we can do for you. There is of course a possibility to have a **sample coating**.

SAFE FOOD PRODUCTION FRANCOIS PRODUCTS

We are specialized in baking trays, baguette trays and pressed moulds and trays.

Non-Stick FBS Coatings
Goldline Black/Brown/Green
